

# I-35 FROM RM 1431 TO FM 3406 (SOUTHBOUND)

## CONSTRUCTION INFORMATION

### Project Overview

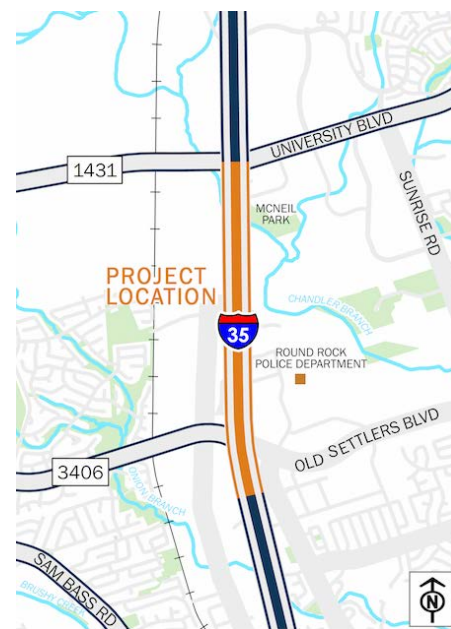

The [RM 1431 to FM 3406 \(Southbound\) project](#) addresses congestion on one of the top 100 most congested roadway segments in Texas. Lack of mobility on I-35 threatens the economic livelihood of Austin and Texas. With more than 150,000 vehicles a day traveling on this segment of I-35 each day, this project will reconstruct and reverse two ramps on the southbound I-35 frontage road between RM 1431 and FM 3406 to address traffic congestion and improve I-35 frontage road and mainlane operations.

The project will reverse ramps on the I-35 southbound frontage road to reduce vehicle weaving on I-35 mainlanes and improve the southbound frontage road by adding an extended entrance/exit lane between RM 1431 and FM 3406. A 10-foot wide shared use path for bicycle and pedestrian access will also be constructed along the southbound frontage road.

### Construction Phases

Work on this improvement project will take place in five phases.

- **Phase I** work includes setting up detours, shifting traffic, and installing temporary drainage in anticipation of construction
- **Phase II** work includes installing temporary traffic barrier and striping for traffic shifts, roadway excavation on southbound frontage road and constructing a 10-foot shared use path
- **Phase III** work includes installing smart traffic devices, complete roadway excavation and paving on the southbound frontage road and paving and widening on the I-35 mainlanes
- **Phase IV** work includes completing paving and drainage for southbound I-35 and frontage road
- **Phase V** work includes installing final overlay and striping to open all lanes and ramps

### Details

This \$9.2 million project is funded by Proposition 1. Work began in November 2016 and is expected to be completed in spring 2018, weather permitting. The contractor is Dan Williams Company.
